

RTGS Renewal Programme approach

The RTGS Renewal Programme is divided into five work packages to enable an agile approach. This allows risks to be addressed while progression is achieved in terms of compliance with regulations and standards as well as innovations in the payments industry to achieve the goals as depicted in the *National Payment System Framework and Strategy: Vision 2025*.

The programme work packages are intended to ensure that we continue to maintain our capacity to deliver settlement services while building a cutting-edge solution to advance and position settlement services for the future. This comes with the commitment to maintain the current service levels.
